Dear distributors,

RE : Video encoder change

Due to discontinue of the current video encoder, we will stop supporting SECAM, PAL-N and PAL-60 from the production of 2011.  
The target model is VG-881 and VG-882.

Although we tried finding new encoder which supports full format, unfortunately we could not find out.

We regret to announce these format discontinue, but we hope you could understand and explain to customers accordingly.

Best regards

Kyoko Mori
